

# MAINTENANCE, INSPECTIONS & REPAIR

## MAINTENANCE

Wagenborg Foxdrill has experience with maintenance on a wide variety of equipment. This includes maintenance on electrical, mechanical, hydraulic and pneumatic components, both on- and offshore. Our maintenance team is also competent to inspect and maintain ATEX equipment.

If required we can assume full responsibility for maintenance of an asset, including spare part management and management of suppliers / OEM's. Not satisfied with your maintenance software? Why don't you use ours? Webbased and developed with efficient maintenance in mind, it can accommodate single components or an entire asset tree. Our aim is to increase reliability while reducing costs.

# MAINTENANCE, INSPECTIONS & REPAIR

## INSPECTIONS

Wagenborg Foxdrill provides various inspection services to asset owners and operators, this includes **API 4G Derrick Inspections** to verify structural integrity of derrick and major components. If required we can team up with derrick equipment OEM's to ensure an efficient and safe operation, which reduces downtime for the asset to a minimum. For temporary removal of heavy components we have a wide range of lifting & rigging equipment available. Our track record includes various derrick types including fully winterized arctic derricks and dual derricks. Our IRATA full membership means that we can access any area using rope access techniques and that safety during work at height is at the highest level.

**Dropped object surveys** are also part of our service range. Our competent inspectors perform a thorough sweep of the installation to find and record any potential or actual dropped object hazards. High risk items are reported immediately to onsite personnel. Results are captured in a structured report using distinctive zones to support efficient solving of any issues. The deliverables are compliant with DROPS.org guidelines (of which we are member).

## MAINTENANCE, INSPECTIONS & REPAIR

### REPAIR

Keeping assets operational and performing as intended is no easy task and often requires a bit more than just a squeeze of the grease gun. Wagenborg Foxdrill is experienced in a wide variety of repair tasks and can also support you in exchange of major components. This includes (but is not limited to) change out of heave compensation systems/cylinders, (re)alignment and/or exchange of guidetracks, exchange of a topdrive, installation of new pipe handling equipment and even a complete beef-up of your derrick.

Cleaning of derrick/wind wall and vent line modifications are also part of our competencies. Inhouse availability of IRATA rope access technicians and equipment + all sorts of rigging equipment & winches mean that there is very little that we cannot handle. Additionally we can provide a Lightweight Lifting System, based on aluminium trusses, it can be assembled on site into a limitless number of configurations.
